—Some Extractions in London
—The World of Trade.****New York, July 18.—Money on call has been easy, ranging from 5 to 6 per cent, last loan at 5 per cent and closing offered at 5 per cent.****Postage rates, \$4.84 to \$4.86.****Government bonds have been steady. Speculation at the stock exchange was characterized today by great depression. A sharp decline in American securities at London, coupled with rumors of the financial embarrassment of an important house there, and heavy sales for foreign account, started liquidations here on an extensive scale and prices declined rapidly. Urged on by their success, the bears circulated stories affecting the credit of some of the most prominent houses in London, Berlin and Amsterdam. On this side the leading factor in creating anxiety at the stock market was the panic reported in Denver, where a general run was made upon the banks. The bears simply carried everything before them, and a very uneasy feeling prevailed in stock circles, although it was to be said that the foreign market was easy. Despite the great shrinkage in values, not a single seizure occurred at the stock exchange. A new record for consumption was made, September having sold 1½c below the lowest point heretofore reached, and the recovery was slight. September sold off 2½c from yesterday's close and December, 1½c. But both futures made a slight rally and were again trading at the opening. The large sale for export at New York caused additional firmness. The close was 1½c lower than last night.****The oats market was affected like wheat and corn by the same causes, but not to nearly the extent as that of cereals. Shorts took advantage of the weakness in July and bought considerably.
